Getting used to Operators and Datatypes

Assignment 0
Computer Programming
Due date: 4 September, 2018

Problem Statement: Given two numbers a and b,output their sum,difference(first - second),product, quotient and remainder when we divide first number with the second one, and lastly,value of a/b upto 10 decimal points precision

Input

Input has a single line with two spaced integers a,b respectively

Output

Print all the required values(5 integers and a decimal) with a space between them.

Constraints

all the given numbers lie between 0 and 2,147,483,647

Sample Test Case

Input	Output
2 7	9 -5 14 0 2 0.2857142857
